However, a wombat pouch is between its back legs and opens toward the ground.● Wombats have strong claws, and they are excellent diggers. |
| Size |
| <ul style="list-style-type: none">● Length: About 75 cm to 1m long.● Weight: 19~40 kgs. |
| Diet |
| <ul style="list-style-type: none">● Wombats can eat only one meal in 14 days.● They eat grasses and roots only.● They seldom drink water because they can get moisture from plants. |
| Other interesting facts: |
| <ul style="list-style-type: none">● The short but powerful legs of wombats can run up to 40 kilometers per hour when needed.● Wombats are good at digging holes and tunnels. The holes and tunnels they dug form their underground homes and are called <u>burrows</u>.● One wombat usually has several underground homes, and each is connected with tunnels.● A wombat doesn’t share his or her burrow with another one but allow to use in different time.● Wombats enjoy living alone except when female wombats need to take care of their kids.● The temperature in burrows doesn’t change very often. Wombats can keep warm in winter and keep from the heat in summer in their burrows. |

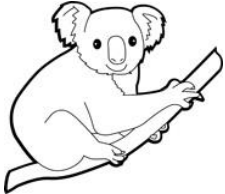

Some people said wombats herd other animals to hide in the burrows during the bushfire. Actually, wombats didn’t call and invite other animals to use their homes. Wombats just “allow “ them to use. Whatever way wombats use,they truly help other animals. Remember get a chance to visit wombats at the zoo when you are in Australia.
