Special Days Camp, a playground for children  
with special needs, gives sick children a chance to be  
"just kids" and experience the fun of summer or  
winter camp. The health of the campers is the most  
important, so there are doctors and nurses around.

The campers say that at Special Days they feel free  
and can escape from their worries. For one week in  
the summer, they can learn about others from different  
countries, make good friends, and try new things.  
Surrounded by others with the same conditions and  
experiences, they "don't feel different."

For parents, Special Days gives them a time of  
break... a break from the everyday challenge of caring  
for a sick child. Here, their child is safe, happy, and  
well cared for.

A great way to live a long and healthy life is by eating food that is good for your body. There are many kinds of healthy diets, but according to experts, the “Mediterranean diet” is the best of 2023. The Mediterranean diet has won the “top diet” title for seven years in-a-row. The diet got its name because many societies around the Mediterranean Sea generally follow this style of eating, and people in those places enjoy good health and long life.

The Mediterranean diet is easy to follow, low-cost, and delicious, focusing on lots of fruits and vegetables. The diet also suggests seafood dishes with limited red meat and emphasizes eating with family and friends. Studies show that it lowers the chance of many health problems. In contrast, experts say the worst diet of 2023 was the “raw food” diet; according to that plan, you can only eat food that hasn’t been cooked!

Dogs are the most popular pet on the planet. Take the USA for example. About 76 million dogs are cared for by 48 million families, when over 58 million cats are kept in 31 million families.

People often say that dogs are man’s best friend. It is mainly because they are lovely, friendly, and loyal. They make great companions for all the family members. In caring for their pet dogs, people also feel loved by them.

Here is a new study that may interest dog lovers. A group of scientists studied 22 dogs and had an interesting finding. The following pictures show how they studied the dogs.

The scientists of this study also found that the dogs did not cry when they came together again with other people they knew. Isn’t it fun?

<div>1</div> <div></div> <div>The scientists watched how each pet dog got along with its owner.</div>	<div>2</div> <div></div> <div>The pet’s owner went away for up to five to seven hours.</div>	<div>3</div> <div></div> <div>The scientists put paper under the dog’s eyes.</div>
<div>5</div> <div></div> <div>The paper was wet.</div>	<div>4</div> <div></div> <div>The dog’s owner came back. His pet jumped up on him and cried with joy.</div>	

One of the scientists said that dogs’ tears never fail to win their owner’s heart. This may be a reason why people love their pet dogs more and more as time goes by.
