Food Waste

Food waste is a big problem all over the world. People almost throw away about one-third of all the food. This means people waste a lot of food before it even gets to the store. Food waste happens in many places, like farms, stores, and even in our own homes.

Food waste is bad for the environment. When food rots in landfills, it makes methane gas. The gas warms the planet. Food waste also uses up a lot of resources, like water and land.

The good news is that we can all do things to reduce food waste. We can plan our meals ahead of time and only buy what we need. We can also learn how to store food properly, so it doesn't go bad.

If we all work together to reduce food waste, we can help protect the environment and make sure that everyone has enough to eat. It's important to remember that food waste is a big problem, but we can all make a difference by making small changes in our own lives.

No one wants to be Kim's assistant. She gives you lots of work and never feels pleased with what you do. However, if you "pass the test," you'll almost 100% sure be promoted to "real" lawyer. I passed, and now I have my own office and my own assistant. Last week Kim kicked out her new assistant. And now she's treating me like her assistant again. "Maureen, get me a cup of coffee." "Maureen, copy this for me." Yes, I can walk to the coffee room and make it for her, but her office is closer to the coffee room. And yes, I know the copying machines better, but now my business card says L A W Y E R, not A S S I S T A N T!

No one will fight Kim because she's dating Emerson, our boss. Fighting the boss's girlfriend won't do you any good. Ted fought her once, and now he's sitting in the smallest office here. Jackson's office is across from mine. He was Kim's assistant before me. He told me to let her know I work WITH her now, not FOR her. "She'll get very angry at first, but she'll forget about you after she finds the next 'lucky' person, and then you'll be OK," said he.

 - (C) She didn't get her new business card.
 - (D) She found a mistake on her business card.

() 37. Which picture best shows Maureen's workplace?

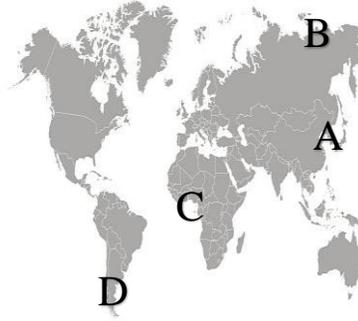

Easter eggs will be more expensive this year because of climate change. Extreme weather is making cocoa more difficult to grow. People use cocoa beans to make chocolate. Most of the world's cocoa beans come from West Africa. The hot weather and heavy rain make it difficult for farmers to grow enough cocoa beans. Because of this, the price of cocoa beans becomes higher! It's more than doubled in the last year! A climate expert said that cocoa farmers are having a difficult time because of the extreme heat and rain.

Easter is a special time when people give each other chocolate eggs to celebrate the story of Jesus coming back to life. Chocolate eggs were first made in France a long time ago, in 1725. Then, in 1873, a company in England made the first hollow chocolate egg, just like the ones we buy today. Now, giving chocolate eggs is a common tradition in many countries.

But climate experts say we need to do something to stop climate change. We need to cut down on using fossil fuels. If we don't, we might not have enough cocoa beans to make all the chocolate we love!
